

2015 ‘O’ LEVELS

“The lesson at Aedno helped me a lot in understanding the concepts and topics that I may not have understood completely in school. As I get to revise the things that I am weaker in, the learning and revision process is a lot more effective. The studio is also very conducive and the teachers are helpful and patient. Overall, Aedno has helped me a lot in my studies.”

- *Natasha Manacika*

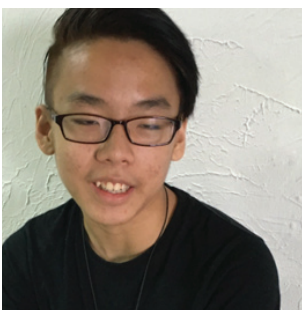

“I came into Aedno with a C6 in Maths and a E8 for Combined Science. I never really understood the subjects but the teachers in Aedno helped me to do that. My teacher has a lot of patience, which was important for me, because I consistently required her to explain the concepts to me. Lessons at Aedno are very unique as it caters to every student’s specific needs. Teachers are always very happy to help.

- *Joy Wee*

Special shout-out for doing well in your transformation journey with Aedno

WHAT OUR STUDENTS SAY

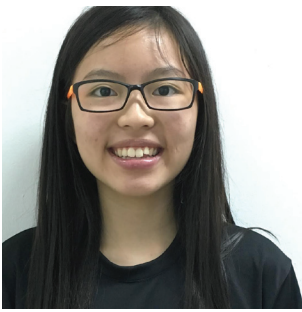

The teachers in Aedno are very encouraging and concerned in helping me do well for my studies. They often motivate and encourage me that I am capable of good results. That sense of commitment has driven me to work hard, and achieved ‘better than expected results’.

- *Tang Jia Qing*

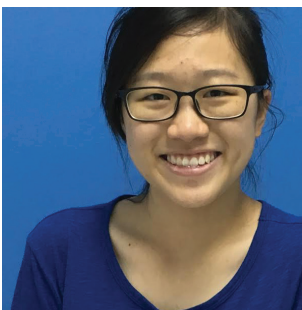

The lessons in Aedno were very helpful in preparing me for my ‘O’ level English language paper. The English lessons conducted by Mr Tham were very engaging and useful, as he provided good tips and impart skills that were essential for me to ace my English paper. Also, Aedno always put the student’s interest at heart as they are very accommodating, in terms of class scheduling and intensity, in view of our busy schedule. Thanks for the experience here.

- *Kennett Tang*

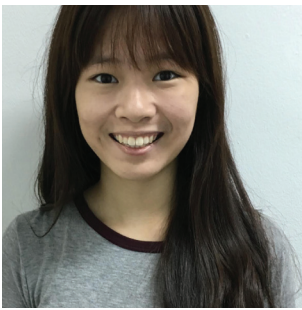

Aedno is a reliable and effective learning studio with caring and approachable teachers who are always ready to help. Our queries are always answered clearly and concisely. Aedno has helped me to achieve A1s for Geography, E Maths and A Maths for my ‘O’ level. Thank you Aedno!!

- *Lee Xiang Yin*

The teachers in Aedno are very helpful and patient. They always try their very best to help me understand the topic by the end each lesson. The efforts put in by the teachers motivates me to work harder. I would like to thank Ms Linda, my lead teacher for 4 years. She has been very concerned about my progress and pays special attention to graduating students. She would stay back for another 30mins after class to address and clarify all our doubts in our learning process.

- *Michelle Foo*

My teachers in Aedno were concerned about my progress in school and provided me with practice questions and notes to improve my answering techniques and understanding. Thank you Ms Linda, who always encourages me to work harder for Physics because I was never good in this subject.

- *Kelly Koh*

Aedno was recommended by a friend. I like the way lessons are conducted here. Not only are the lessons very interesting and engaging, the teachers are also very helpful in providing useful tips and skill sets to help in our understanding and answering techniques. My overall experience in Aedno is great.

- *Dylan Yong*

I was struggling in my Mathematics and Chemistry before coming to Aedno. Under the guidance of Mr Kumar and Ms Givon, I did well for these two subjects. Mr Kuma is very effective in his teaching because he will go straight to the point and explain concepts concisely. Ms Givon is very approachable and has a lot of patience and passion in explaining the concepts and guiding me to achieve good results.

- *Anjou Ang*

Lessons in Aedno are very unique as it caters to every student’s needs specifically. The Teachers always ensure that our doubts are cleared and we truly understand the topics or subjects clearly before the lesson ends. The notes and questions provided are very helpful and differentiated according to our levels of understanding and ability.

- *Germaine Wong*

I joined Aedno since Primary 3, and left after completing my PSLE. I returned to Aedno during my final year examinations to prepare for my “O” level exam as my brother (former Aedno Student who is in Poly 2nd year now) did well for his “O” level. With the patience and guidance of the teachers in Aedno, I persevere and eventually I made it. Thank you.

- *Jermay Tan*

The environment is also very comfortable and conducive for my study. I manage to transform and achieve the desired results for my studies.

- *Denise Chan*
